

A WORKFORCE FIT FOR THE FUTURE

Respect, in partnership with SafeLives and Drive, is launching a package of training courses designed to safely meet the growing demand for more **domestic violence perpetrator programmes and interventions.**

With more funding than ever before going into perpetrator interventions, it's vital that we develop and grow the workforce to ensure interventions are delivered safely and effectively, with survivor safety at the centre.

If you're already working with perpetrators and you'd like to develop your skillset, or you're someone with transferable skills who would like to explore a career working with perpetrators, check out the courses below or find out more [here](#).
