About this dataset

This data report forms part of a series of publications from SafeLives' Adult Insights dataset. It contains 1,170 unique individual cases at intake and 1,340 matched cases at exit, drawn from 20 outreach services across England and Wales which used the SafeLives Insights outcome measurement service between April 2017 and March 2018. It compares this year's data to data from the Safelives Insights datasets for 2016-17 and 2015-16.

SafeLives runs the largest national database of domestic abuse cases in the UK. Our Insights database has records of more than 69,000 unique cases of adults experiencing domestic abuse from 2009 to date, and a further 3,617 unique cases of children in domestic abuse households from 2011 to date. These datasets give us an unparalleled overview of the national picture of domestic abuse.

We hope that everyone working to stop domestic abuse will be able to use this data to improve their services so that victims and families get the right help sooner.

At a glance

20 services

1,169 clients entered services

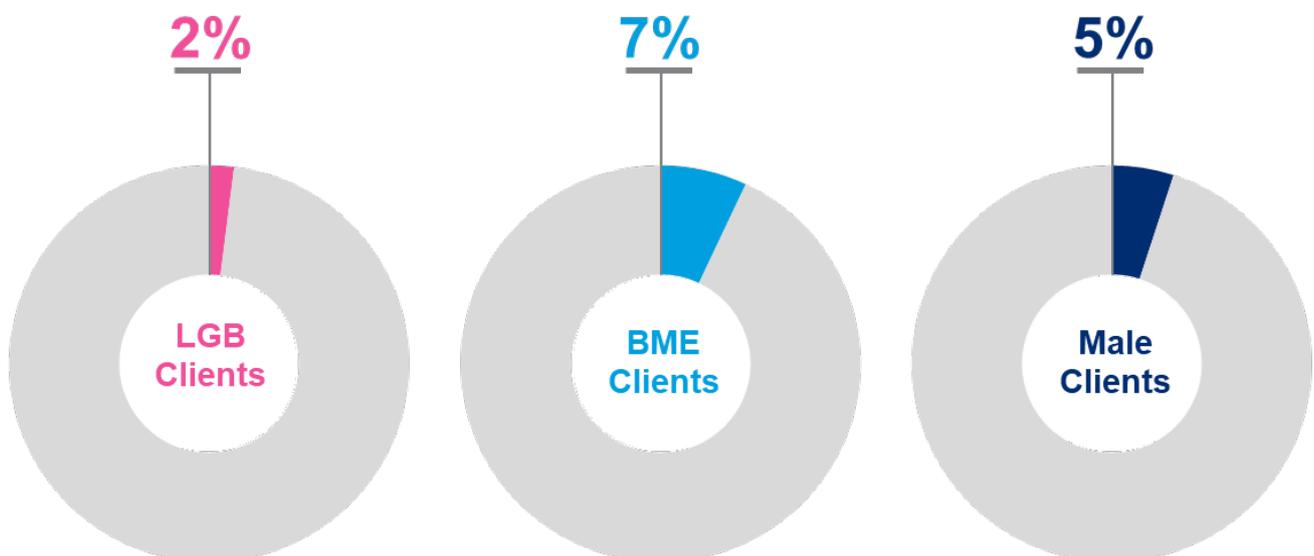

1,307 cases closed

104 clients supported with criminal and civil justice

Location of the services in the dataset

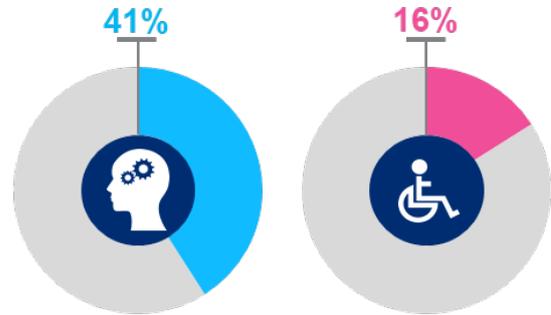

Proportion of clients from diverse client groups

Key findings

After support from a caseworker, the **abuse stopped completely** for half of outreach clients

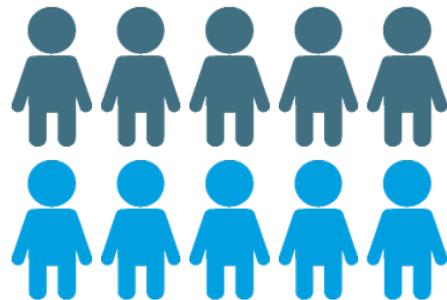

Two-fifths of clients had issues with **mental health** and **14%** had a **disability**. **9%** of clients had a **physical disability**.

There were **children** living in or regularly visiting the household of

67%

outreach clients

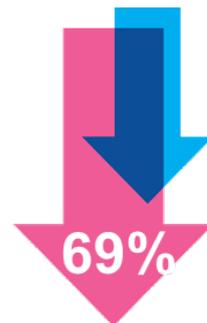

52% of children in households where domestic abuse was taking place **were not known to children's services**

46% outreach clients not living with the perpetrator of abuse had **ongoing contact**

This was because of **children** in **81%** cases

Risk was reduced for more than two thirds of clients

following support from an outreach worker

Service inputs

Cases used in the analysis

Intake forms 1,169

In the period April 2017 to March 2018, caseworkers submitted 1,214 intake forms for clients entering outreach services. 44 forms were excluded from the dataset due to the client appearing twice, and 1 form was excluded due to being completed incorrectly. These forms contain information about client demographics, and the characteristics of the abuse that clients accessing outreach services are experiencing.

For the period April 2016 to March 2017, there were 3,510 valid forms submitted, and for the period April 2015 to March 2016 there were 3,650 valid forms submitted.

Exit forms 1,307

Caseworkers submitted 1,370 exit forms for clients leaving outreach services for the period April 2017 to March 2018. Of these 30 of these were excluded due to the client appearing more than once and 33 were excluded due to being completed incorrectly. These forms were then matched to their corresponding intake form to provide a picture of client outcomes at the point of exit compared to intake. They also contain information about what interventions the client accessed.

Intake dates may occur prior to the period April 2017 to March 2018. For the period April 2016 to March 2017 there were 3,187 valid forms submitted, and for the period April 2015 to March 2016 there were 3,418 valid forms submitted.

Criminal and civil justice forms 104

Caseworkers supporting clients with criminal and civil justice (CCJ) submitted 107 forms for the period April 2017 to March 2018. Of these, 2 were excluded due to the client appearing more than once and 1 was excluded due to being completed incorrectly. These forms provide information on the outcomes of any criminal and civil justice interventions at exit.

For the period April 2016 to March 2017 there were 447 valid forms submitted, and for the period April 2015 to March 2016 there were 630 valid forms submitted.

New Referrals/ Repeats	2018		2017	2016
	%	n=	%	%
New Referrals	76%	888	83%	84%
Repeats	24%	281	17%	16%
Total	100%	1,169	100%	100%

Cases are considered repeats if the client has returned to the service after their case was previously closed (or made inactive).

Client outcomes

Outcomes and profile of abuse at exit (Information captured at exit, n=1,307)

The following is an analysis of cases where an exit form was completed during the reporting period. Cases have been matched with their corresponding intake forms, and intake data here relates only to the cases which also have exit data, so will vary from the number of cases in the intake dataset.

88% of the cases with exit data were closed by the case worker according to the service's case closure policy. 12% were made inactive due to a prolonged period of no contact.

Client circumstances at exit	n= 1307
