About this dataset

This data report forms part of a series of publications from SafeLives' Adult Insights dataset. It contains 3,211 unique individual cases at intake and 2,149 matched cases at exit, drawn from 11 Outreach services which used the SafeLives Insights outcome measurement service between April 2020 and March 2021.

SafeLives runs the largest database of domestic abuse cases in the UK. Our Insights database has records of more than 81,000 unique cases of adults experiencing domestic abuse from 2009 to date, and a further 6,000 unique cases of children in domestic abuse households from 2011 to date. These datasets give us an unparalleled overview of the picture of domestic abuse.

We hope that everyone working to stop domestic abuse will be able to use this data to improve their services so that victims and families get the right help sooner.
